Open Autodesk Autocad. Click on "File" tab. Under "open" click on "File" and select "Add Existing Program". A window like this one will appear. Choose the autocad exe (Exported and Compiled by adline1) and run it. You can see that "x" image is on the right (1280*720) and the autocad has similar dimensions. # Use the product key - The first step to download the data and build the map. In order to use the product key, we have to find out the key ID for each of the product. The key is on the bottom of your autocad document (If you have only Autocad and not other plugins. If you don't see any key, you may need to activate the Autocad and open the desired file. Go to "File" > "Info" > "Key IDs" and find out the key ID. You can read the details about the key on Autodesk's official website: - The second step is to put the images into each folder and use the key to combine them. You will need: - the original map you are interested to convert. - the images you are interested to convert. - The key ID you have found. - The tool you will use to put the images into the proper folder. - The tool you will use to put the images in the proper folder. The map is composed of small images (like the key is composed of different small images). In order to put the images in the proper folder we will use the command line. The program that do that is command line : "Visual Studio Command Prompt" Let's read the official documentation:
